

The Asia Pacific Exhibition Industry & COVID-19

Government support for the exhibition industry

Government support for businesses in general

Actions taken by the exhibition industry to support the COVID-19 crisis

updated 30/9/2020

This document lists support measures from Asia Pacific's country/regional governments to businesses in general and the exhibition industry in particular. We hope that by gathering together examples of financial and other support for the exhibition industry, it will encourage other governments and policymakers to do the same in their respective markets.

Exhibitions and trade shows will be a fast-track to economic recovery once the coronavirus crisis has passed and they will deliver the best return on investment now. We have also listed examples from around the world of how the exhibition industry can support this crisis, converting exhibition halls to temporary hospital wards and other initiatives.
